Hot Melt Laminating Film From China

Detail Introduction :

Hot Melt Laminating Film From China

Product features of the Hot Melt Laminating Film from China

Hot Melt Laminating Films from China have several advantages over other types of laminating films. For e
they can be used for automotive headliners, duct tapes, breathable apparel, and labels. They are also com
with other materials such as TPU films. They are particularly versatile, with applications in medical devices
fabrics, and cured in-place pipe rehabilitation.

The hot melt adhesive film produced by HMT Manufacturing has a long shelf life and is recyclable, as it do
contain any backer paper. The hot melt adhesive is also water-free, making it ideal for laminating, washab
breathable, and soft materials. The laminated materials can be cut immediately. This means that laminatin
more flexible than traditional processes.

Hot melt adhesive film from China is a non-toxic thermoplastic film. It bonds materials with very high adhes
also have good adhesive strength and good elasticity. The hot melt adhesive has no cure time and is a gre
for many uses, including textile and sports equipment. This is why it is becoming such a popular option for
laminating. You can even laminate textiles and apparel using hot melt adhesive.

This film is available in rolls of 500 feet. It contains no backer paper and is 100% glue. It has no liner that r
be peeled before use. The hot melt adhesive bonds immediately once heated. It does not contain water, s
no need to wait long for the adhesive to dry. It can be cut immediately after laminating. You can also instal
laminating machines that work with 4-way stretchable fabrics.

Another important feature of the Hot Melt Laminating Film is 100% glue and has no liner paper. When activ
heat, this film bonds instantly with any material, including textiles. It does not require curing time and is ava
500' rolls. In addition to its durability and flexibility, the hot melt adhesive film is suitable for all kinds of app
