Seamless boat socks

Detail Introduction :

| Product description

Non-marking boat socks are a must-have item in women's clothing and are very popular among female co
The production of non-marking boat socks also requires the use of hot-melt adhesive film. Since clothes a
washed and boat socks are often pulled during the process of wearing, TPU hot melt adhesive film with go
elasticity is often used, which should have excellent resilience and water resistance, so that the non-marki
produced are more resistant and not easily damaged.

It is a high-end TPU hot melt adhesive film product with high elasticity, washing resistance and high tempe
washing resistance.

Shanghai Hengning New Material Co., Ltd, engaged in the application development research of environme
protection hot melt adhesive products, hot melt adhesive film, hot melt adhesive mesh film product range i
you have more questions about the application of hot melt adhesive film, or material bonding problems, ple
